## **DETAILED ACTION**

## Election/Restrictions

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - Claims 1-5, drawn to an apparatus for performing operation on a data within a network, classified in class 707, subclass 10.
  - II. Claims 6-9, drawn to an apparatus for generating a subscription of events within a network, classified in class 719, subclass 318.
  - III. Claims 17-19, drawn to an apparatus for downloading files in a network, classified in class 707, subclass 200.
- 2. The inventions are distinct, each from the other because of the following reasons: Inventions I-III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, claims of group I perform an operation on particular data content, claims of group II generate a subscription of events and claims of group III are downloading files, each of the respective inventions has separate utility such as in a system not having the others. See MPEP § 806.05(d).
- 3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 2166

4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for the other Group, restriction for examination purposes as indicated is proper.

- 5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
- 6. A telephone call was made to Mr. Todd Ravey on 01/31/2006 to request an oral election to the above restriction requirement, but did not result in an election being made.
- 7. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
- 8. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
